1. Introduction	3
1.1. The basics	9
1.2. Systemic Approach and Practice of Gerontology	20
2. Biogerontology	45
2.1. Biogerontology: Overview and Basics	45
2.2. Theoretical Gerontology: Aging Hypotheses	54
2.3. Molecular Gerontology: Proteins and aging	75
2.4. Genetics of Aging: Determinants	90
2.5. Geriatrics	124
2.5.1. Aging and diseases	124
2.5.2. Examination of the elderly	134
2.5.3. Physiological and Pathological Changes of the Nervous system with Age	149
2.5.4. Cardiovascular system of Old Age and its Diseases	160
2.5.5. Aging of the Pulmonary System and its Diseases	168
2.5.6. Aging of the immune system	175
2.5.7. Characteristics of the Changes of Gastrointestinal System as a Function of age	184
2.5.8. Endocrinology of Aging	191
2.5.9. Age-related Changes of Bone-Joints-Connective Tissue and their diseases	197
2.5.10. Characteristic Changes of the Mouth, Chin Bones and Teeth	206
2.5.11. Ophthalmological and Dermatological Problems in Old Age	211
2.5.12. Age-related Changes of Kidney and Urinary System and their Diseases	221
2.5.13. Infectious Diseases in Old Age	225
3. Society Gerontology	235
3.1. Sociopolitical Gerontology I: Demographics	235
3.2. Sociopolitical Gerontology II: Graying Societies	255
3.4. Social Gerontology I: Care and Attendance	271
3.5. Social Gerontology II: Care for the Dying	281

4. Psychogerontology	294
4.1. Gerontopsychology	294
4.2. Gerontopsychiatry	307
5. Prevention and Aging	314
5.1. Prevention and Aging	314
6. Possibilities of the Deceleration of Aging	323
6.1. Theoretical Possibilities	327
6.2. Practical Possibilities	331
6.3. Gerolimentology, Herbs, Recreation	336
